Grade 4.5 to 5.0, Extra Clean- Vehicle is in excellent condition, with only minor defects in panel surfaces as noted in the condition report. The body panels require no conventional body or paint work. There are no missing, broken, or damaged parts that require replacement. The interior compartment has no cuts, tears, or burns that require repair and does not show signs of wear. Vehicle is mechanically sound and all accessories are operable except for as noted in the detailed portion of the condition report. The overall grade score is an average of several different areas of the vehicle's condition and not to be used to determine the condition of any one area.

Grade 3.5 to 4.4, Clean- This vehicle will be better than average unit with minor chips or scratches in panel surfaces as noted in the condition report. This vehicle may require minor conventional body and paint work or removal of small dents that have not broken the paint using Paintless Dent Repair. The body of the vehicle may have had high quality conventional repairs. A minor missing or broken part may require replacement as noted. The interior is clean and will show minimal wear. The vehicle may have sustained cosmetic or light collision damage and been repaired to collision industry standards. Vehicle is mechanically sound and most accessories are operable. The overall grade score is an average of several different areas of the vehicle's condition and not to be used to determine the condition of any one area.

Grade 2.5 to 3.4, Average- The average vehicle will have normal wear and tear (for example, parking lot dings, small scratches, chips and/or minor broken parts). It may require some conventional body and paint work or replacement of parts as noted in the condition report. The interior shows signs of normal wear and usage, requiring repair or replacement of parts as noted. Prior repairs may have been performed on this vehicle at an acceptable quality level. The vehicle may have sustained cosmetic or light collision damage and been repaired to collision industry standards. Vehicle is mechanically sound, but may require maintenance or minor repair. The overall grade score is an average of several different areas of the vehicles condition and not to be used to determine the condition of any one area.

Grade 1.5 to 2.4, Below Average- Vehicle shows signs of abnormal wear and tear. The body has dents, scratches, and body panels that may require replacement as noted in the condition report. Broken and missing parts are to be expected. The interior shows signs of excess wear with burns, cuts or tears, and non-removable stains as noted. This vehicle may have multiple prior repairs performed at substandard levels, which may include repaired or unrepaired collision. Vehicle may have mechanical damage that prohibits vehicle from operating properly. Repairs can be made, but engine and/or transmission may be in poor condition. Operation of accessories is questionable. The overall grade score is an average of several different areas of the vehicles condition and not to be used to determine the condition of any one area.

Grade 0.0 to 1.4, Rough- This vehicle has been severely abused or has sustained major collision damage, but may be drivable. It is cost prohibitive to extensively recondition this vehicle by automotive industry standards. Although, operable, this vehicle is near the end of its useful life. Operation of accessories is doubtful. The overall grade score is an average of several different areas of the vehicles condition and not to be used to determine the condition of any one area.

These are general guidelines for defining appropriate rating of vehicles. This rating system takes into account the year and mileage of the vehicle.

All items inspected are guaranteed to be in good condition, unless otherwise noted. **The Condition Report will only indicate items in need of repair.**

The Condition Report and Booksheet are guaranteed to be accurate (i.e. year, make, model, VIN, mileage, equipment).

General Arbitration Rules/Procedures

Buyers are responsible for submitting vehicle into arbitrations that fail the ABS Auto Auctions guarantee, or any vehicle misrepresented from the booksheet in which the vehicle was purchased. When the buying dealer receives the vehicle, it must be inspected within 48 hours of delivery (excluding weekends/holidays). Upon inspection, if discrepancies occur, the buying dealer is required to fill out an ABS arbitration form (can be obtained on the website @ www.absautoauctions.com or from your sales rep) and fax it to the arbitration department. Phoning in an arbitration to your sales rep does not constitute filing an arbitration with ABS, the arbitration must be submitted to the arbitration department. We at ABS know that all dealers have their own set of standards and it cannot be expected that everyone reconditions their vehicles to the same level of standards. Also, remember that the cars sold through our auction are pre-owned vehicles and cannot be expected to be in brand new condition.

If the selling dealer does not think the arbitration presented from the buying dealer is legitimate, he may request an ABS Auto Auctions representative to view the vehicle, to confirm the complaint. The buying dealer is required to support the complaint with an estimate of repairs for mechanical items.

The selling dealer must pay transportation both ways (to buyer and back to seller) for vehicles returned for arbitration reasons (whether buyer refused vehicle, the two parties could not agree on an arbitration amount or the seller requests their vehicle be returned). Transportation was provided, and fees are due once the vehicle is returned to the selling dealership.

It is standard ABS Auto Auctions procedure to automatically adjust any vehicle "misbooks" misrepresented on a selling dealership's booksheet that is \$500 or less. In the event of this situation, the vehicle will be re-booked, adjustments will be made and both parties will be faxed a new draft reflecting the revised price. *** All Rental Fleet/Lease vehicles are exempt from this procedure. Once ABS arbitration is notified of the misbook, they will notify the selling dealer, confirm approval of the adjustment and then notify the buying dealership of approval or denial.

Definitions of Equipment Adds

Custom Bumper: A bumper that the manufacturer charges extra for on the MSRP or dealer invoice. A bumper that is installed after the purchase of the vehicle and has more value than the original bumper. In the case of a truck that bumpers are not standard equipment, any bumper added is considered custom. On most SUV's a bumper is included in the base price of the vehicle.

Premium Wheels: A premium wheel is considered to be more valuable than an alloy wheel. A factory alloy that has been chromed is a premium wheel. An aftermarket wheel is not always considered premium. It must be of high quality. A steel wheel that is chrome is not considered premium (example: Ford, Dodge, and Chevrolet trucks have chrome steel wheels that are a less expensive option than an alloy wheel option). These wheels will not get a premium add, but an alloy wheel add is acceptable.

Premium Sound: This add is for a stereo system that the factory charges as an upgraded sound system. For example: Bose, Infiniti, Mach, Harman Karman, Monsoon, or Toyota's Triple Sound System. Aftermarket sound systems must be of "high quality" in order to receive this add.

Wide or Oversized Tires: Tires must be a larger than the standard size offered by the factory. For example: 17" tire and wheel option on a Ford F150 or Expedition. Aftermarket tires that are taller or wider than the factory original equipment must not affect the operation or calibration of the vehicle. In order to receive the equipment add, tires must be at least 4/32's even wear tread depth. Cupping on a tire is unacceptable. Example: Wide tires must be 2 sizes up from factory specs.

Sun and Moon roof: Must be a power slider. A moon roof is clear and a sunroof is solid. ** Aftermarket roofs must be disclosed on the booksheet.

Rental & Out of State Disclosures

The selling dealer is responsible to disclose **previous rental** status. If the discloser is not made, the buying dealer may return the vehicle or arbitrate the selling price and request the standard adjustment of \$200 (Which will be treated as an automatic misbook under \$500). Buying dealer is responsible for checking previous rental status when receiving the vehicle or when they receive their copy of the Carfax/Auto check with their ABS draft and notifying the ABS arbitration department within the 48 hour arbitration period.

Out of State/Country vehicles must be disclosed by the selling dealer. The buying dealer is responsible to check when receiving the vehicle or their copy of the carfax/auto check with their ABS draft and notifying the ABS arbitration department within the 48 hour arbitration period. The buying dealer has the option of keeping the vehicle or returning it to the selling dealer.

Carfax and Autocheck

A Carfax or Autocheck report will be provided to the buying dealer at the time of the draft. The report provided will be what is requested by the buyer and the report the buying dealership uses for their retail customers. Any discrepancies on the report are the responsibility of the buying dealer to confirm and report to the ABS arbitration department within the 48 hour arbitration period. Any future reporting turned into Carfax or Autocheck after the 48 hour arbitration period are not eligible for arbitration. The only report that ABS will consider binding is the report provided at the time of draft.
